<b>CHAPTER 1 – INTRODUCTION</b> .....	1
<i>Ricardo Noguera Louzada ♦ Jaime Guedes ♦ Sacha Fernandes ♦ Dillan Cunha Amaral</i>	
1.1. What are Systematic Reviews and Meta-Analyses? .....	1
Key Points .....	1
Definition of Systematic Review .....	1
Definition of Meta-Analysis .....	2
Differences and Complementarity Between Systematic Review and Meta-Analysis .....	2
Complementarity .....	3
Importance in Scientific Research .....	3
1.2. Objectives and Benefits of Systematic Reviews and their Importance in Ophthalmology .....	3
Clinical Applications and Practices .....	3
Identifying Knowledge Gaps .....	4
Consolidating Evidence .....	4
Improving the Quality of Clinical Guidelines and the Impact on Clinical Protocols .....	4
Personalization and Uncertainty in Treatments .....	5
Evaluation of Emerging Technologies and Interventions .....	5
Enhancing Evidence-Based Decision-Making .....	5
Guiding Future Research Directions .....	6
1.3. Types of Systematic Reviews and Meta-Analyses .....	6
Systematic Review of Randomized Controlled Trials (RCTs) .....	6
Systematic Review of Observational Studies .....	6

Systematic Review of Diagnostic Studies .....	6
Network Meta-Analysis (NMA) .....	7
Single-Arm Meta-Analysis .....	7
Overview of Reviews (Meta-Review) .....	7
<b>CHAPTER 2 – PLANNING AND PREPARATION .....</b>	<b>9</b>
<i>Jaime Guedes ♦ Sacha Fernandes ♦ Dillan Cunha Amaral ♦ Ricardo Noguera Louzada</i>	
2.1. How to Initiate a Systematic Review and Meta-Analysis.....	9
Steps to Formulate a Testable Hypothesis .....	9
Structuring Research Objectives.....	11
Formulating Research Questions Using PICO or PICOTT .....	11
Developing the Review Protocol .....	14
Importance of the Protocol.....	14
Developing a protocol is a critical early step in any systematic review and meta-analysis.....	14
Components of the Protocol.....	14
Protocol Registration Platforms.....	15
Enhancing Protocol Rigor in Ophthalmology.....	16
2.2. Selection of Inclusion and Exclusion Criteria.....	17
Defining the Comparisons to Be Made.....	17
Defining Inclusion Criteria .....	18
Defining Exclusion Criteria .....	19
Randomized Controlled Trials (RCTs) .....	20
Non-Randomized Studies .....	20
Considerations Specific to Ophthalmology Studies.....	21
Integrating Inclusion and Exclusion Criteria into the Review Process.....	22
2.3. Selection of Information Sources.....	24
Relevant Databases .....	24
Importance of Searching Multiple Databases .....	25
Search Strategies and Keywords.....	26
<b>CHAPTER 3 – DATA COLLECTION AND EVALUATION .....</b>	<b>33</b>
<i>Sacha Fernandes ♦ Dillan Cunha Amaral ♦ Ricardo Noguera Louzada ♦ Jaime Guedes</i>	
3.1. Study Selection.....	33
Screening and Selection Process.....	33

Using Reference Management Software .....	34
Resolving Conflicts in Inclusion Decisions .....	35
Transparency in Study Selection.....	35
3.2. Data Extraction.....	35
What is Data and What Data Should Be Collected?.....	35
Types of Data and Effect Measures.....	36
Tools for Data Extraction and Organization .....	37
Essential Information for Ophthalmology Studies .....	38
3.3. Assessing Methodological Quality and Risk of Bias .....	39
Importance of Methodological Quality and Risk of Bias .....	39
Tools for Critical Appraisal.....	40
Assessing Risk of Bias.....	41
Interpreting Results.....	41
Documentation and Transparency.....	42
Assessing Risk of Bias in Randomized vs. Observational Studies.....	42
Combining Evidence from Different Study Designs .....	42

**CHAPTER 4 – DATA ANALYSIS AND INTERPRETATION OF META-ANALYSIS DATA..... 45**

*Dillan Cunha Amaral ♦ Ricardo Noguera Louzada ♦ Jaime Guedes ♦ Sacha Fernandes*

4.1. Synthesizing Statistical Data: How to Perform a Meta-analysis .....	45
4.2. Analysis and Interpretation .....	47
Fixed-Effect and Random-Effects Models.....	47
Effect Size Calculation and Confidence Intervals.....	48
Confidence Intervals (CIs) .....	48
4.3. Assessing Heterogeneity .....	48
Methods for Evaluating Heterogeneity .....	48
Strategies for Addressing Heterogeneity .....	50
4.4. What is and How to Interpret a Forest Plot.....	51
Basic Structure of the Forest Plot .....	53
Visual Elements of the Forest Plot.....	53
Interpreting Results of a Forest Plot .....	54
4.5. What is and How to Interpret a Funnel Plot.....	54

4.6. Subgroup and Sensitivity Analysis.....	56
Definition and Importance .....	56
Sensitivity Analysis and Result Robustness .....	57
4.7. Recommendations for Clinical Practice and Implications for .....	58
Limitations and Strengths of the Review.....	58
Conclusion of the Application in Ophthalmology .....	59

**CHAPTER 5 – WRITING AND PUBLICATION .....** 61

*Ricardo Noguera Louzada ♦ Jaime Guedes ♦ Sacha Fernandes ♦ Dillan Cunha Amaral*

5.1. Structure of the Systematic Review Report .....	61
Essential Components for Writing a Meta-analysis.....	61
5.2. Review and Editing of the Manuscript.....	63
Techniques for Reviewing and Editing.....	63
Importance of Peer Feedback.....	63
Practical Tips for Effective Editing a Meta-analysis.....	64
5.3. Selecting the Journal and Submission.....	64
Criteria for Journal Selection .....	64
Submission and Peer Review Process.....	65
5.4. Responding to Reviewer Comments .....	66
Strategies for Addressing Reviewer Feedback .....	66
Critical Analysis.....	66
Implementing Suggestions and Making Revisions.....	67

**CHAPTER 6 – IMAGE PROCESSING IN SYSTEMATIC REVIEWS  
AND META-ANALYSES IN OPHTHALMOLOGY .....** 69

*Jaime Guedes ♦ Sacha Fernandes ♦ Dillan Cunha Amaral ♦ Ricardo Noguera Louzada*

6.1. Role and Importance of Imaging in Systematic Reviews .....	69
6.2. Standardization of Imaging Data .....	70
Challenges in Standardization.....	70
Solutions for Standardization.....	70
6.3. Image Quality Assessment .....	70
Criteria for Quality Evaluation .....	70
Tools for Quality Assessment for Images .....	71
Image File Formats and Their Characteristics .....	71

File Formats Accepted by Journals .....	72
Recommendations for Image Preparation for Submission .....	72
6.4. Future Directions and Applications in Ophthalmology .....	72
Innovations and AI in Imaging .....	72
Practical Applications in Ophthalmology .....	73
Ethical and Practical Considerations .....	73
<b>CHAPTER 7 – CASE STUDIES AND PRACTICAL EXAMPLES .....</b>	<b>75</b>
<i>Sacha Fernandes ♦ Dillan Cunha Amaral ♦ Ricardo Noguera Louzada ♦ Jaime Guedes</i>	
Section 7.1: Systematic Review on Glaucoma – A Detailed Case Study ...	75
Section 7.2: Meta-Analysis on Refractive Surgery - Meta-Analysis on Corneal Collagen Crosslinking for Ectasia Post-Refractive Surgery .....	77
Section 7.3: Systematic Review on Retinopathy: A Case Study on Retinal Detachment and Macular Holes Secondary to Ocular Toxoplasmosis .....	79
<b>CHAPTER 8 – FINAL CONSIDERATIONS AND FUTURE                 DIRECTIONS .....</b>	<b>83</b>
<i>Dillan Cunha Amaral ♦ Ricardo Noguera Louzada ♦ Jaime Guedes ♦ Sacha Fernandes</i>	
8.1. Summary of Best Practices .....	83
8.2. Challenges and Limitations in Systematic Reviews and Meta- Analyses .....	85
8.3. Future Trends and Directions in Research .....	88
Promising Areas for Ophthalmological Research.....	89
8.4. Conclusion.....	90
Acknowledgments.....	90
